A guide to your Food Organics Garden Organics (FOGO) system

USING A KITCHEN CADDY

What is a FOGO bin?

FOGO stands for Food Organics and Garden Organics. Your FOGO bin is for kitchen scraps and garden material which will be used to create compost. A handy way to think of FOGO material is "If it lived or grows - in it goes."

Why FOGO?

Around 50% of our household waste is food scraps and garden organics. The FOGO bin makes it easy for you to separate this material, so that it can be turned into compost instead of going to landfill.

By separating your waste correctly, you are already making a positive impact on our community. The new bin system will also allow the City of Belmont to recover more waste as a resource, divert waste from landfill and reduce the cost of waste management.

Food organics and garden organics make up about 50% of household waste. By putting organic waste in the FOGO bin it can all be turned into compost.

The City of Belmont has provided a kitchen caddy and a supply of certified compostable liners, to help separate your food scraps. If you move out, please leave the kitchen caddy behind.

If you use a caddy liner, ensure it is certified compostable.

As they break down easily, it is recommended to change caddy liners every 2 to 3 days.

Remember: Never use biodegradable bags as these do not break down and will contaminate your FOGO material. Alternatives to a liner include; homemade newspaper liners, or placing food scraps loose in the kitchen caddy.

Certified compostable liners

These are made from natural materials, break down easily and can be composted. Certified compostable bags always have the seedling logo.

Biodegradable or degradable bags

These break down into fragments of plastic and contaminate the compost.

Plastic bags

These don't break down and contaminate the compost.

What can go in your FOGO bin?

If it didn't grow, it's not FOGO. Only food scraps, garden waste and compostable liners can go in the lime-green lid FOGO bin.

Bread, rice and dairy

Meat, bones, shells and seafood

vegetables

Coffee grounds

Used paper and tea bags towels, tissues and shredded paper

Plants, weeds and small prunings

Compostable liners and food contaminated paper products

IMPORTANT INFORMATION

No nappies

No plastic

No glass

THREE EASY RECYCLING RULES

Small plastic lids contaminate recycling.

Loose items get recycled, items in bags do not.

If you're unsure what should go in your yellow lid recycling bin, download the Recycle Right App or find the answer online at recycleright.wa.gov.au

GENERAL WASTE NOW COLLECTED FORTNIGHTLY

WHAT CAN GO IN YOUR RECYCLING BIN?

Paper and cardboard

Cans

Plastic bottles and containers

(lids removed)

Items must be clean, empty and loose in the bin.

IMPORTANT INFORMATION

No food scraps

No batteries or hazardous waste

No clothing

No nappies

Use your general waste bin for items that cannot be composted or recycled. If you're sorting your waste correctly, this smaller bin should be big enough for most households.

- General rubbish
- Nappies and hygiene products
- Soft plastics and polystyrene
- Meat trays
- Small plastic items (straws, lids, cutlery)

IMPORTANT INFORMATION

No e-waste

No light globes

No aerosols

No paint

For more information on FOGO and any other waste enquiries, contact the City of Belmont via:

Website: www.belmont.wa.gov.au/fogo

Email: fogo@belmont.wa.gov.au

Phone: (08) 9477 7222

Office Hours: Monday to Friday, 8:30am to 4:45pm

For additional information on what goes in each bin or disposal options: Visit recycleright.wa.gov.au or download Recycle Right from the App Store.
