

I am running to bring new life to the council, I am passionate and dedicated to my local community. I have volunteered for Council projects like the stories and skills, and I have volunteered with the Belmont Seniors since 2018 calling bingo. I want to have the council be more approachable and take less time to reply to residents' submissions (complaints, queries etc...). I want more bus stops to have bus shelters (to encourage more public transport use), I want to have the City's planning be at their best to help build buildings that require less energy use and that have great aesthetics. The city needs to investigate the costs for all suburbs to have underground power. I know as an individual councilor I do not have the power to change things, but I will work with all to have council and the City strive for a better Belmont.

Some may be put off by my young age and to them I would say it gives me more reason to listen and talk with others to assist in my decision making. Council impacts all our lives, from rubbish bins, landscaping, festivals, assisting local groups and so much more. Belmont is a growing area, and with our location to the CDB and Perth Airport, we need people who don't just look till the next election but the future. Our population is growing, and we are not getting new land. We need to start properly planning what Belmont should look like in the future. We need to work together on this and other projects to make Belmont the standard of how councils operate and their vision. Ignore my age and ask, is what I am saying crazy? Do you not want a council that has a vision and take you along instead of forcing you? Let us strive for a better Belmont together.
