

Goal 1 - Liveable		
Comment	Action Taken	
1	There is a need to relax existing bureaucratic red tape and allow for community groups to hold markets, stalls etc. without fees. This creates local centres such as the community garden at Wilson park. Support existing groups and their aspirations and increase community funding.	Considered for inclusion into the review of the Corporate Business Plan.
2	Having lived in Belmont all our lives , we are now retired & live within the ( city centre) . We find that approx one eighth of our bin is filled by rubbish that emanates from the old Belmont village & the Belmont tavern , we understand that the council control Belmont Ave down Wright St to Knutsford Ave . The Forum look after management of south side of the tavern to the cinema. The whole area most mornings is a disgrace, with rubbish everywhere, more so when easterly winds are blowing . This is even more obvious to visitors to the area as the new civic centre is rapidly nearing completion. The tavern say it's not their problem, the forum management aren't interested.council employees that are occasionally seen to clean up the verge on Wright st tell me they will only do what they have been instructed to do ie no illegal dumping ect . Hope this helps .	Continue to deliver services to the community and engage with the the Belmont Forum. Service levels are reviewed and audited on an on going basis and implemented to meet the targets and goals set within the Waste Avoidance and Resource Recovery Strategy 2030.
3	Exercise equipments in the parks are great ideas. I have seen and used them in China as well. They also have body message items. Would like to see more available in other parks.	Considered for inclusion into the review of the Corporate Business Plan. Two new installations to be delivered in the next 6-12 months.
4	My daughter and her family live in Yomba Street opposite the fenced off cycle park. As if life is not depressing enough at present, they have to look across from their home at this very sad sight. When will this park be back to some sort of child friendly, family friendly, happy place for the community to enjoy, instead of the disgusting mess it is at present. I understand that asbestos is supposed to be present somewhere there? surely by now moves have been made to eradicate this. I look forward to your response.	Continue to inform the community via direct contact and social media channels. Peachey Park playground works to re-commence early in the 2020/2021 financial year.
Goal 2 - Connected		
Comment	Action Taken	
5	We need more exclusive use paths for cycling and walking. Not joint paths but separate paths for pedestrians and cyclists.	Considered for inclusion into the review of the Corporate Business Plan.
6	Support making connect corridors through the city that encourage people to walk or cycle, rather than use their petrol/diesel vehicles. More encouragement and infrastructure (e.g. specific parking bays for electric cars) is need for environmentally friendly modes of transport.	Continue to plan green corridors through the implementation of the STP to connect major parks.
7	Right turn lanes need enough length to turn during the right turn signal of the intersections e.g. the right turn lane between the Bunnings and the Good Guys can be improved.	Construction programmed over 2020-2021 and 2021-2022 to lengthen both turning pockets.
8	There needs to be more paths around parks i.e. Peet Park, you need to cross the road to walk around the park as there is footpath on 3 sides not 4 .	Considered for inclusion into future path budgets and the review of the Corporate Business Plan.

Goal 3 - Natural		
Comment	Action Taken	
9	There is a need to stop developers from removing mature trees. Develop an historical tree register. Plant suitable native species rather than exotic unsuitable ones.	Considered for inclusion into the review of the Corporate Business Plan and relevant corporate policies.
10	Please make a fenced dog park. Small and large breed separate	Considered for inclusion into the review of the Corporate Business Plan and the Public Open Space Strategy.
11	We are very fortunate to enjoy the family walk near the river. Please try to control the mosquitos because they cause a big problems for kids with several red itchy bites even during day time.	Continue to monitor and provide control services as per the Mosquito Management Plan.
12	There needs to rubbish bins at all the bus stops and more along the streets. It would be good to see some water tanks that provide drinking water at parks, garvey park etc. I live on a cul-de-sac and would like natives planted not just dead grass and weeds that get mowed, such a waste of resources.	Commence audit program to detemine levels of service for waste. Continue to increase native plantings as per planting program. Continue to provide water fountains as per parks amenity.
Goal 4 - Creative		
Comment	Action Taken	
13	Would it be possible to attract Government offices from the City to our local area. It will safe the trouble going to Perth. Other local councils has done that for their people to work locally as well.	Considered for inclusion into the proposed Economic Development Strategy.
14	Do we have Youth department to speak to the boys and girls cleaning car windscreens at the traffic lights. Giving them an opportunity to learn and do meaningful apprenticeship or part time works may be good for their future and safer for them and the drivers as well.	Considered through the Community Safety Taskforce. Continue to liaise with Main Roads and Community Groups.
15	I believe there will be a recording studio in the new council building later this year. Recording local Musicians original content would be a great way of promoting Belmont talent and I'd love to participant and assist if possible.	Considered and will commence as part of promotion of the Belmont hub, deployment during 2021.
16	It would be good to encourage local artists to provide like a 'sculptures by the sea' idea at local parks, have voting and some prizes.	Considered for inclusion into the review of the Corporate Business Plan.

Goal 5 - Responsible		
Comment	Action Taken	
17	How is 'Community engagement and consultation' a measure? Should this read satisfaction, perception or quality?	Considered for inclusion into the Strategic Community Plan.
18	Inclusiveness should also be a factor. You have to be registered to participate in this engagement and also online. What other ways are you engaging your community that isn't online? The City has a high multicultural population - how are you engaging CALD community?	Included as part of the process. Feedback for the development of the Strategic Community Plan included direct engagement via meetings, coffee chats and workshops. Due to COVID-19 final feedback for the draft was restricted to online only.
19	May we suggest that you encourage the maintenance of the rich multicultural community you have, and provide resources towards this purpose.	Included as part of the new Multicultural Strategy 2020 & Beyond.
20	How about considering community satisfaction with the Council overall, not just about rates? Responsiveness and timeliness to community groups' requests could be a measure of satisfaction and performance.	Considered for inclusion into the Strategic Community Plan.
21	Belmont's parks and infrastructure are quite well maintained. But what's sadly lacking are the basic facilities especially public toilets.	Considered for inclusion into the review of the Corporate Business Plan.
22	The opportunity for people to involve in this exercise is very much appreciated. A succession for the Council members should be considered to allow multicultural aspect based on the great wealth of people living in Belmont. Passionate leaders are good assets if combined with great efficiency and qualifications. If possible the Election process may be able to link with the desirable Selection process to attract great leaders.	Continue to advertise and promote candidate nominations as well as hosting information sessions in the lead up to local government elections.
